Notification Endpoints

[Add Endpoint](#) This build is parameterized Permission to Copy Artifact Promote builds when... Override the default scheduler preference Prepare an environment for the run Disable Build (No new builds will be executed until the project is re-enabled.) Execute concurrent builds if necessary Restrict where this project can be run

Label Expression

loadrunner

Slaves in label: 1

Advanced Project Options

Source Code Management

 None Git Mercurial StarTeam Subversion Use SCM from another project

Build Triggers

 Trigger builds remotely (e.g., from scripts) Build after other projects are built Build periodically Build when a change is pushed to GitHub Build when another project is promoted GitHub pull requests builder Poll SCM

Build Environment

 Abort the build if it's stuck Ant/Ivy-Artifactory Integration Do not build if only specified paths have changed Generate environment variables from script Generic-Artifactory Integration Gradle-Artifactory Integration Inject environment variables to the build process Inject passwords to the build as environment variables Maven3-Artifactory Integration Provide Node & npm bin/ folder to PATH Reserve a VMWare machine for this build SSH Agent Send console log to Logstash

Build

Execute HP tests from file system

Make sure to enable the **Publish HP tests result** option in the **Post-build Actions** section. This allows the tests results to be published.
