We are running into a strange issue where the linux slaves would disconnect intermittently (happening at least once a day) with the below error:

```
Slave JVM has terminated. Exit code=0
ERROR: [09/11/17 08:00:37] [SSH] Error deleting file.
ha:////4BJzQ5KK22T5KWhPnJrxKFXkoZSAiG2JwcOgVPNHFspbAAAAVx+LCAAAAAAAAP9b85aBtbiIQSmjNKU4P08vOT+vOD8n\
/PLL0mV3NWzufebKBsTA0NFEYMUmgZnCA1SyAABjCCFBQC2xNaiYAAAA==com.trilead.ssh2.SFTPException: No
such file (SSH_FX_NO_SUCH_FILE: A reference was made to a file which does not exist.)

Could you please raise the issue in Jenkins JIRA? https://issues.jenkins-ci.org/
I suppose there are already duplicates since it's a Trilead Issue (CC **@paladox** and **@mc1arke**)

Off-topic: **@jglick** **@olivergondza** should we just disable Issues in this repo?

~~I agree with Oleg this needs to be filed in JIRA as it is likely unrelated to this plugin.~~ It seems `ssh-slaves` plugin does not expect the `slave.jar` might be gone after the agent was disconnected and fails deleting file that does not exist. Note that this failure effectively obscure *why* did the agent connection got broken on the first place.

Hi, looks like your using an older version of this plugin 1.11. 1.21 is available and was updated to support the trilead update. Also please try jenkins 2.73.1.

It looks like he is also using sftp. I've only tested with ssh.

I have the same issue on 3 linux slaves. To fix the problem I move the plugin back to 1.21 and now it's 1 month no more connection lost with slaves.

Master and Slaves: CentOS 7.3
I would fill a JIRA bug but I have no more logs about exception (needed to understand the issue), and
I can not update (because this blocks all CI in our system organisation)

> should we just disable Issues in this repo?

Yes please. **@oleg-nenashev** I think you have the admin access to do that.
